DR 1205 - Practical Driving Tests Results

(b) Pass Rate

Figures show the number of volume of car tests conducted, by location and result, for the 200809 FY.

Figures show all customers, and the subset of customers who were under 21 years old at the time of test.

Only tests of class C (Car Manual) or CA (Car Automatic) are included.

Please note - while the majority of customers undertaking the car tests would have been learners at the time, a small proportion of customers who have transferred from overseas, or who were upgrading from an automatic (CA) to manual (C) licence will be included in these figures.

Figures for QPS conducted tests are not available by age group - only a summary is available.

Figures are current as at 14/09/2009.

Figures are obtained from the Driving Examinations Reportnet Package which obtains data from SBS/DEX.
